

The Dominion of British West Florida need not be restored. The Dominion needs to be recognized. Ours is a nation that was illegally annexed by the United States of America in the year of our Lord 1810. Our remaining defenders were defeated in 1813. For the last one hundred and ninety-seven years we have been a people in occupation.

In the ten generations of occupation, the United States of America has brought war to our land, allowed our infrastructure to fall behind the rest of the world; ill prepared our people in terms of education, disaster preparedness, and economic depression. Has this lessened the resolve of the Dominion's citizens? No. We seek a day when our institutions are finally reconstituted.

Many nations have been tested as we have been. Those that survive the crucible of armed occupation do so through nationalist ideals and a firm dedication to their nation's history. The loyal citizens of the Dominion of British West Florida will never allow the Dominion's identity to be extinguished. We will see that our history and its legacy continue well into the future. Should we not live to see restitution in our time, we will prepare the succeeding generations that follow us.

In the Lord's plan, there are precious few things that no man, storm, or beast can take from us. Our Faith is a great gift we can always retain. Our identity as a sovereign nation is another.
